

The Vanguard 15 is a recreational sailboat, built predominantly of fiberglass. It has a fractional sloop rig with aluminum spars, a raked stem, a vertical transom, a transom-hung rudder controlled by a tiller and a retractable daggerboard. It displaces 200 lb and is capable of planing upwind. The boat has a draft of 3.42 ft with the daggerboard extended and 6 in with it retracted, allowing beaching or ground transportation on a trailer or car roof. For sailing the design is equipped with a boom vang and the mainsail and jib have windows for improved visibility. The halyards are external and the mast is of a non-tapered design. Does not come with trailer and none are for sale. Call us to make an appointment to see her.
